Recap 2020/21

AWARE+SHARE

Over 400 participants from more than 20 countries took part in our first digital event AWARE+SHARE! Thanks to everyone that participated in any way!

AIM Project: Technology and Innovation Management

How to solve a problem of social relevance during the pandemic? – Digitally! 37 participants from THI and UFSC developed product ideas such as a happy box to prevent elderly people from social isolation and presented them to a commission of THI and UFSC professors during a 10 min pitch.

Review AWARE+SHARE  Find out more about the AIM Project
Within the frame of the AWARE network, THI Business School together with Senac (National Service of Commercial Apprenticeship Senac) in Santa Catarina and the Federal University of Santa Catarina (UFSC) established in 2014 an exchange group called RITUSS (Retail – Responsibility – Industry – Innovation – Technology – Sustainability) with the goal to promote the exchange of technological knowhow and expertise regarding different markets and to share research projects. The cooperation encompasses a variety of activities: joint events such as technology forums, development of joint international MBA programs in Retail Management, technical supervision and support for students in market research.

Simulation of a battery-powered drive train

In close cooperation with Volkswagen Argentina, a group of THI students will co-work digitally with students from Technical University of Argentina (UTN) on the development of a demonstrator for a battery-powered drive train. The main goal is to work remotely in an international and interdisciplinary project team, expanding their engineering knowledge in mechanics, dynamics, electrical engineering and programming in an intercultural learning atmosphere. The digital project funded by DAAD in the ongoing project enGlobe – engineers go global (HAW.International – Modul B) will be completed with workshops in both countries including a presentation of the final results to Volkswagen Argentina. Both groups will be supervised by a professor with deep experience in electric mobility at THI and UTN.

New Projects

GearUxP! - German Argentinian User Experience Program

In November 2020, our UXD team at THI around Prof. Andreas Riener and FADU School – School of Architecture, Design and Urbanism – of the University of Buenos Aires (UBA) started their joint project GearUxP! – funded by the German-Argentinian University Center (DAAD). GearUxP! seeks to combine UX-related skills, such as prototyping, multimodal systems, virtual reality technologies, trained at THI, with design-oriented skills trained at UBA.

Al@motion International with Brazil, China and Finland

In order to position the recently established Almotion Bavaria Institute of THI, a hub for AI Mobility research in Bavaria, in the international research landscape, the AWARE Center successfully submitted the project Al@motion International to DAAD. The project’s core mission is to establish an international AI research network with universities and industry partners from Bavaria, Brazil, Finland and China. In the following two years, joint strategy meetings, network conferences, hackathons and a digital research platform will consolidate the network and promote joint research on AI and mobility in the future. Al@motion International was kicked off in January 2021 with an overall budget of 400,000€ in the DAAD program HAW.International (Modul A).

ROTA 2030

Our mission: Improving road safety!
With motorcycles generally being most affected in traffic accidents in Brazil, the mission of our research project Motorcycle detection at the vehicles’ blind-spot using radar sensors is to identify them early enough at vehicle’s blind spots by developing a detection system based on radars. The project counts on a total volume of 270,000€ and is coordinated by Professor Werner Huber at THI and Lester Faria at Centro Universitário Facens in Brazil. It is funded by the Brazilian Ministry of Economics within the funding program Rota 2030 offering tax incentives to the automotive industry to invest in technological developments and R&D innovation projects with universities.

Welcome!

New AWARE Partners

USP – University of São Paulo, Brazil
Coordinator AI@mation International in Brazil

ITA – Aeronautics Institute of Technology in São José dos Campos, Brazil
ROTA 2030 partner
New AWARE Fellows
Our eng.join! Fellows
Studies abroad at THI

Bruno Henrique Romano
Bachelor Student
Engineering of Transport and Logistics
(UFSC, Joinville)

Henrique Bonafé Takamori
Bachelor Student
Automotive Engineering
(UFSC, Joinville)

Nicollas Barauce Freitas
Bachelor Student
Aerospace Engineering
(UFSC, Joinville)

Our enGlobe Fellows
Research stay at THI

Angelo Abdallah Pelisson
Master Student in Electronic Systems Engineering
(UFSC, Joinville)
With Prof. Dr. Ondrej Vaculin

Adriano de Souza Pinto Pereira
Graduated in Mechanical Engineering
(UFSC)
With Prof. Dr.-Ing. Ulrich Tetzlaff
Anderson de Lima Luiz
Master Student in Electrical Engineering (UFPR)
With Prof. Dr. Alessandro Zimmer

Kristie Kaminski Küster
PhD Student in Electrical Engineering (UFPR)
With Prof. Dr.-Ing. Daniel Navarro Gevers
