## University of Brasilia

- The University of Brasilia (UnB) was created in 1962 following the joint vision of the anthropologist Darcy Ribeiro and the educator Anísio Teixeira.
- Its conception came from the same revolutionary spirit that gave rise to the federal capital, Brasília: to renew the methods of learning and to teach towards the future.
- Dedicated to the promotion of free, inclusive and high-quality education, UnB is among the best universities in Brazil.
- Its institutional mission is to produce, integrate and disseminate knowledge, and to educate citizens to be committed to ethics, social responsibility and sustainable development.
- In 1995, the Serial Evaluation Program (PAS) was created, the first form of university entrance evaluation in three stages - with exams held in each high school year.
- In 2003, UnB was the first Brazilian federal university to approve affirmative action for black and indigenous applicants.

## Teaching

- At the University of Brasilia, teaching is inseparable from research and extension.
- At the undergraduate and graduate levels, students can carry out scientific experiments and transform knowledge into social benefits.
- Multidisciplinarity is a prominent feature of the University.
- In addition to attending compulsory courses, students can complement their education by attending courses in other departments and areas of interest.
- Lectures, academic conferences, presentations and workshops happen daily on the campuses.

## Inclusion

- UnB values diversity, forming a more pluralistic and egalitarian academic community.
- Currently, 50% of the vacancies in the main selection processes are destined, by law, to students of public schools. At the discretion of UnB, more than 5% of the opportunities are reserved for Afro-Brazilian students.
- Institutional policies and programs also promote equity in higher education.
- People with disabilities have personalized support in the classroom and for their daily academic activities.
- There are special places and actions that exist to guide and welcome students in order to combat intolerance, to promote educational reflection and to strengthen cultural and political minority groups.
- For students in a situation of social vulnerability, UnB offers financial assistance; student lodging; free food at the University Restaurant; book vouchers and scholarships for foreign languages courses.

## Research

- 320 laboratories and more than 500 research groups focus their efforts on finding new paths to solving different problems.
- At the undergraduate level, students are initiated into scientific research in three major areas: Exact Sciences and Technology, Arts and Humanities, and Health and Life.

- At the graduate level, researchers receive financial incentives to carry out their research, to publish scientific papers and to participate in national and international conferences.
- Participation in research encourages better classroom performance, creates links with professors, opens exchange opportunities and prepares the student for graduate education.
- Dean of Graduate Education: [www.international.unb.br/grad](http://www.international.unb.br/grad)
- Dean of Research and Innovation: [www.international.unb.br/r-i](http://www.international.unb.br/r-i)

## Extension

- UnB develops more than 300 extension projects.
- Professors, staff and students work in areas such as health, human rights and justice, environment, technology, agricultural sciences, education, communication and culture.
- There is constant dialogue between the knowledge acquired in classrooms and laboratories and the knowledge of citizenship, solidified by practice.
- UnB develops projects in order to promote social and regional integration.
- The Latin America Culture House preserves the cultural heritage of UnB and promotes dialogue with neighboring countries.
- Dean of Extension: [www.international.unb.br/extension](http://www.international.unb.br/extension)

## Internationalization

- From 2012 to 2017, UnB received 749 foreign students, and sent 943 exchange students to universities all over the world.
- There are more than 270 agreements with foreign institutions, in 47 countries, which allow undergraduate and graduate students to supplement their studies through exchanges.
- These agreements also enable the cooperation between UnB and foreign professors and researchers, the exchange of research, the formation of knowledge networks and international publications.
- International Affairs Office: [www.international.unb.br/int](http://www.international.unb.br/int)

## Sports and Culture

- At the Olympic Center, students take classes and practice physical activities, being able to choose different types of sports.
- High performance student-athletes receive financial assistance, sports training, and educational, nutritional and psychological support.

Center of Excellence in Olympic Diving. Photo: Júlio Minasi

- It is easy to find music, visual and plastic arts, literature and theatrical performances happening, spontaneously or institutionally, on lawns and in corridors and auditoriums on campuses.
- The academic community can enjoy and actively participate in film viewings, choir performances, musical presentations, festivals and exhibitions.

## Central Library

- The Central Library operates daily and offers a variety of services, such as book loans, interlibrary loan (copies of technical and scientific documents from Brazilian and international libraries), database training and guided visits.
- It has a general and reference collection of approximately 1.5 million copies and more than 35 types of works.

## UnB Publishing House

- Founded in 1962, it is one of the most traditional university publishers in Brazil.
- The UnB Publishing House catalog has more than 600 titles. Bookstore: *Centro de Vivência* at Campus Darcy Ribeiro.
